

9-11 September 2026 Orange, NSW

STUDENT POSTER SESSION

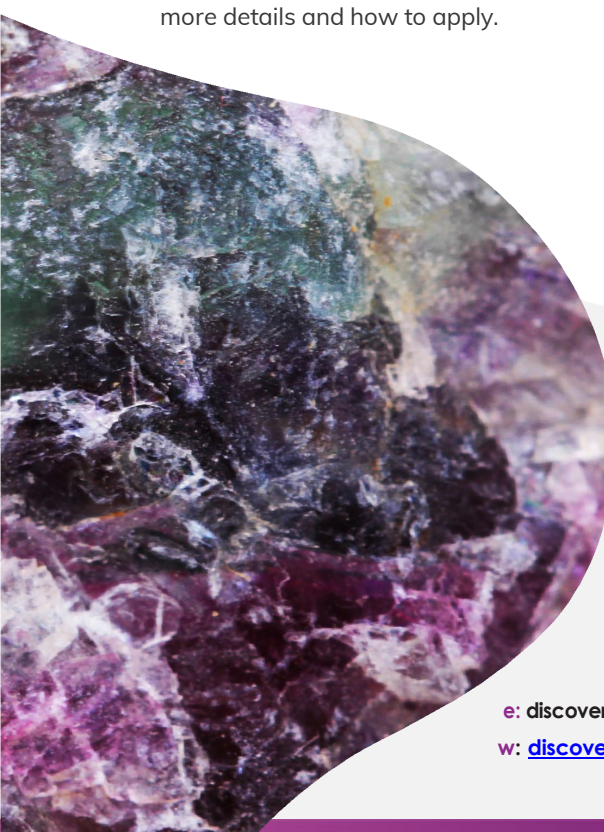

Student Poster Session

The conference provides all students (Honours, Masters and PhD) an opportunity to present their work and exchange ideas with the broader community. The subject matter for the posters should be related to their current studies in mineral exploration or related geoscience research. Students should speak to their supervisors if they wish to participate then register on the conference website as a student poster. Posters must be to a professional standard with appropriate content, text and graphics to the page sizes required. Any student submitting a poster will receive free entry to the conference. Registration includes delegate status at the conference and entry to the dinner, which is a good networking event.

Any student submitting a poster will have the opportunity to give a 2-minute presentation of your project at the conference. Do not miss out the chance to showcase your great work! SMEDG is offering a pool prize of \$1,000. At the judges' discretion the amount will be split among the best three posters.

Bursaries can be sought for travel and accommodation through AIG or AMEC. Please visit [Bursaries](#) to see more details and how to apply.
